How the Auction Works:

All lots have a starting price displayed on the board. All lots are sold simultaneously. Bids will rise by a minimum of \$25. Buyers may bid the starting price of the pony. Bids are written on a bidding slip together with lot number & bidding number and handed to the auctioneer who then updates the board.

A period of 1 hour is allowed initially for bidding. If there is a bid on any pony in the last 5 minutes, the closing time for the auction is extended by a further 10 minutes. If a bid is recorded in the last 5 minutes of the extended time period, then the auction is extended by a further 10 minutes. This will continue while bids are received in extended time. When no bid is received in the final 5 minutes of an extended time period, the sale will close. All lots that have received bids will be deemed to be sold to the last and highest bidder. Any lots that do not receive a bid may be for sale by private negotiation after the auction at the discretion of the vendor. Any Lerwick entry that fails to receive a starting bid will be retained by the stud.

It is important that all people attending register at the office and obtain a bidders number. Anyone wishing to bid on a pony must obtain a bidder's number as this number is displayed on the board against the lot number and the bid price. It would be appreciated if all buyers would place their bids early to avoid going into too much extra time and so dragging out the sale unnecessarily. Keep in mind that no ponies are sold until all bidding has finished.

***Don't forget to bring a suitable headstall & lead
for your new pony!***
